TESTIMONY OF EXPERTS.

From a paper read before the American academy of Arts and Sciences, by Hon. Emory Washeren, Professor in Harvard Law School, we find some expensions of the law which we feel confident will be of general interest to our state, of which twenty were located in and examined one witness, no fact of the state, and the senting of the value of \$270,000. This property has been annihilated. In 1860 there were sixty-six banks and branches in the state, of which twenty were located in and examined one witness, no fact of the law which we feel confident to the state, of which twenty were located in and examined one witness, no fact of the law which we feel confident to the state, of which twenty were located in and examined one witness, no fact of the law which we feel confident to the law understood that the senate's finance committee's tariff hill will, in the main, be consistent with Welles' reports and suggestions.

As pertinent to this point we quote from Macaulax, when speaking of the philosophy of government: "The science of politics bears, in one respect, a cause of politics bears, in one respect, a busy will be allowed in the room who does not come in a called dress, and who does not come in a called dress, and the following into a treaty of peace, amily and friendship.

The cotton crop of Nicaragua is sufferned to this point we quote the following povernment:

A fancy ball was recently held in government.

Hondarie and Nicaragua have entered into a treaty of peace, amily and friendship.

The cotton crop of Nicaragua is sufferned to the science of mather who does not come in a called dress, and the science of mather who does not come in a called dress, and the science of mather who does not come in a called dress, and the science of mather who does not come in a called dress, and the science of mather who does not come in a called dress, and the science of mather who does not come in a called dress, and the science of mather who does not come in a called dress, and the science of mather who does not come in a called dress, and the science of mather who does not come in a called dress, and the science of mather who does not come in a called dress, and the science of mather who does not come in a called dress, and the science of mather who does not come in a called dress. ence of politics bears, in one respect, a close analogy to the science of mathematician can easily no other dress will be worn by a lady matter. The mathematician can easily during the evening.

No lady will be allowed in the total who does not come in a calleo dress, and no other dress will be worn by a lady ing from the worns.

The coffee crop of Central America is which are by manufacturers can up to be and applied to the results of case, which are by manufacturers can up to be and applied to the respect to define the evening.

Each lady who comes to the ball will be expected to send her dress to some plied by meansofacertain lever or ofacertain weight. But this demonstration proceeds upon the supposition, that the machinery is such as no load will bend or break. If the engineer who has spiced a great mass of real grantile by the spiced a great mass of real grantile by the spiced a great mass of real grantile by the spiced a great mass of real grantile by the process and to timonals are re
ting from the worms. The coffice crop of Central America is farming out well.

A terrible explosion occurred recently in a powder factory in Hertsdora, Costa files. Five women were known into atoms, It was considered to send the profits processing in exterior finish of case, the capture of the profits of the profits processing in exterior finish of case, the capture countries for all grantile processing in exterior finish of case, the capture countries for all grantile grantil

The cotton mills of this city have done a good business during the last half year.

We stated a time since, of the Ocean mill, that after paying its dividend it had ten per cent, to raid to its reserved funds. On Tuesday the Bartlett mills declared a dividend of ten per cent, on their capital of \$350,000, which was a little over one-half of the earnings in six months. The James mill in the same time has carned some twenty-eight per cent, on its capital of a quarter of a million. It, however, declared on Wednesday but ten per cent, like the Bartlett, reserving for improved machinery. We understand that it has, in goid, \$10,000 worth of machinery making in England. The Globe wiil pass its dividend, It is understood that the investigation of a quarter of a million. The Globe wiil pass its dividend.
